

Web Developer
Leeds, West Yorkshire
£Competitive Salary plus benefits

Working within the Research and Development department of an innovative product development company, you will be involved in the design, development and maintenance of Web 2.0 applications. You should have a strong background in traditional Web development and demonstrable experience of browser scripting and AJAX, for rich internet applications (RIAs).

Very strong technical skills in XHTML, JavaScript, CSS, AJAX/JSON and DOM Scripting are required, together with good knowledge of Web Standards, cross-browser development and security. Other desirable skills include the Google Maps API, KML and the Prototype framework.

You will be working within a team that includes Graphic Designers and server-side developers who work with ASP.NET, C#, SQL Server 2005 and IIS. Knowledge of any of these technologies would be beneficial but is not essential.

This is an excellent opportunity to work on leading edge Web projects, within a highly skilled, multi-disciplinary development team.

Candidates should have a minimum of 2 years experience in a similar role.

Preferred Qualifications:

- Honours degree or equivalent relevant experience

Key non-technical skills:

- Excellent problem solving skills
- Analytical approach
- Excellent communication skills

All employment at Datong is subject to UK security clearance.

Datong offers an attractive benefits package for the right candidate including:

- 25 days holiday, increasing with length of service
- Stakeholder pension after 3 months (company matches contribution 3-5%)
- Optional health cover after two years service
- Life assurance
- Annual bonus based on company performance
- Gym membership contribution of up to £20 per month

Datong has a strong growth record with a strategic plan for continued growth in the future through both organic expansion and acquisition. Further background on the company can be found at www.datong.co.uk.
